

# Pipeline Inspection

TesTex offer rigorous pipeline inspection services, including API 570 assessment, as often required by regulatory bodies & insurers.

We take advantage our proprietary technology to deliver added capabilities such as CUI & weld detection without the need to remove insulation or cladding.

## Benefits

- API 570 Inspection, Calculations & Recommendations
- Rapid Corrosion Screening using LFET Scanning
- Wall Thickness Survey
- P&ID Drawings
- Inspect Welds through Linings and Coatings
- Find Weld Locations Without Removing Insulation
- CUI detection through up to 4" of Insulation
- Automated Rapid Corrosion Scanning for long pipeline runs using LineCat
- Use of Magnetic Particle, Dye Penetrant, Ultrasonic, Eddy Current & Visual inspection techniques
- Detailed Reporting, including appropriate repairs, inspection intervals, drawings
- Post Repair Inspection with additional report
